

Local Access and Movement Improvements

Local improvements to pedestrian infrastructure will be delivered as part of the development, providing residents with safe and convenient connections to local public rights of way for recreational walking.

New Bus Service

Following discussions with local public transport operators, a new bus service is proposed to run from Fartherwell Avenue and Ewell Road via Offham Road and West Street to the High Street, and onto West Malling railway station. This will make a significant contribution to improved accessibility for residents.

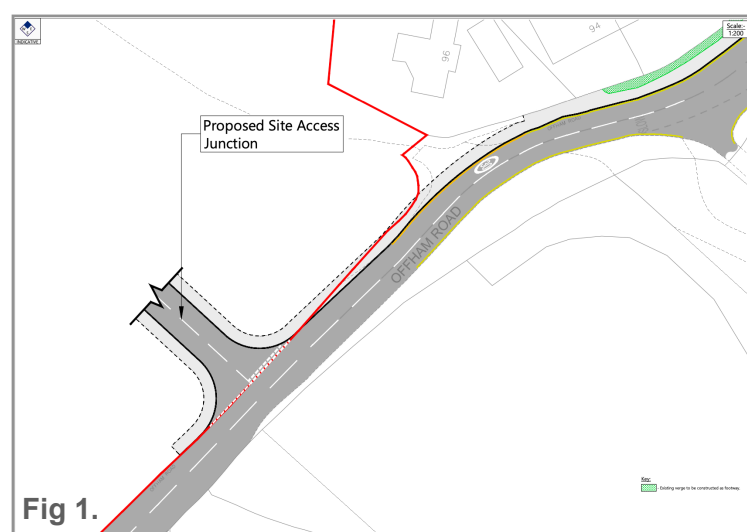

Fig 1. Vehicle access to the site will be taken from Offham Road via a new priority T-junction, with footways provided on both sides of the road. A new section of footway will extend from the existing path on Offham Road into the site.

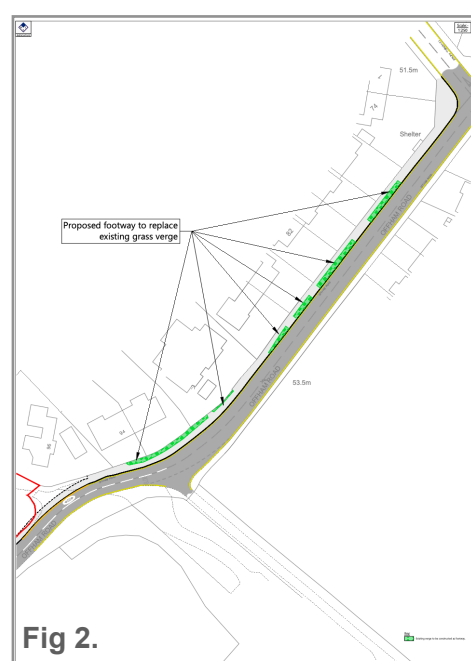

Fig 2. Short sections of grass verge along the northern side of Offham Road will be replaced with new footway. At the Fartherwell Avenue and Offham Road junction, new tactile paving will be installed to assist visually impaired pedestrians.
